

Mandate and purpose of cancer registration

The collection, registration and analysis of data on cancerous diseases are regulated by law in Switzerland.

Cancer registration creates the necessary data basis to:

- monitor the development of cancerous diseases;
- develop and implement preventive and early detection measures and monitor their effectiveness;
- evaluate the quality of care, diagnosis and treatment;
- support healthcare planning and research.

(in accordance with Art. 2 of the Federal Act on the Registration of Cancerous Diseases)

**Sound data for prevention,
early detection and treatment**

On behalf of the Swiss Confederation and the cantons
